Distribution: F

An (*) identifies revisions from the previous edition.

Section 17A- MICAP PROCEDURES (RCS: HAF-LGS (D)7113)

17.4.5. (Added) (Added-USAFA). USAFA Form 0-729, **MICAP Checklist**, will be used as the USAFA MICAP Checklist. Demand Processing will maintain these checklists in NSN sequence.

17.8.1. Use of lateral support will be at the discretion of the Program Manager.

Section 17B- AWP PROCEDURES

17.24.3. Make immediate NRTS disposition on centrally procured XF3 assets which are repairable and which are excess to base requirements. Report all AFLC XF3 critical items to the Item Manager as repairable for disposition. If the unsatisfactory status cannot be improved (parts will not be available within 30 days to repair an XF3 item, causing a work stoppage), obtain lateral support, local purchase, or local manufacture support, provided resupply of the XF3 item itself is not more favorable.

17.24.4. The AWP Monitor will review the repair status of these assets every 45 days. NRTS disposition will be taken after 180 days if repair parts are not obtained and approved by the Chief, Management and Systems Flight.

17.27.3. Maintenance will store all AWP end-items.

D. R. DILLINGER
Chief of Logistics
